

METHOD FOR THE TRANSFER OF TECHNOLOGY USING A WEB-BASED TECHNOLOGY MANAGEMENT SYSTEM

ABSTRACT

5 A computerized, network-based technology management system and method that delivers qualified prospects to a seller or purchaser of proprietary intellectual property, which may be, but is not limited to patents, trademarks, and copyrights. This networks and methods interest, encourage and retain qualified prospective purchasers to progress through
10 successively restricting levels and fulfillment of demands of an owner or licensor of intellectual property. As the demands of each viewing level are met by a qualified prospective purchaser, that prospective purchaser is viewed and rated by successively more stringent security techniques, which authenticate and verify the qualifications of the prospect.
